

DEFCORP

Company Profile 2024

Introduction.

We are a security company that offers simplified security solutions to our valued clients from within and out of Zimbabwe. Defcorp Private Limited was incorporated in 2018 and has been working on its objectives diligently mindful of the key categories that the company focuses on, that is:

1. Security Guard Services and Equipment
2. Closed Circuit Television Surveillance(CCTV) and Access Control Systems
3. Solar Energy Systems

As a vibrant enterprise we also extend to training services. With our reputation and history in business we continuously work diligently towards attaining organizational goals whilst prioritizing customer satisfaction.

Objectives

1. To be the leading security service provider
2. To be the best in fix and supply of strong and durable solar energy systems and equipment.
3. To excel in modernised electronic systems and access control units

Vision

To provide simplified security solutions, with the thrust of sustaining our high market share through competitive and exceptional service delivery by 2030

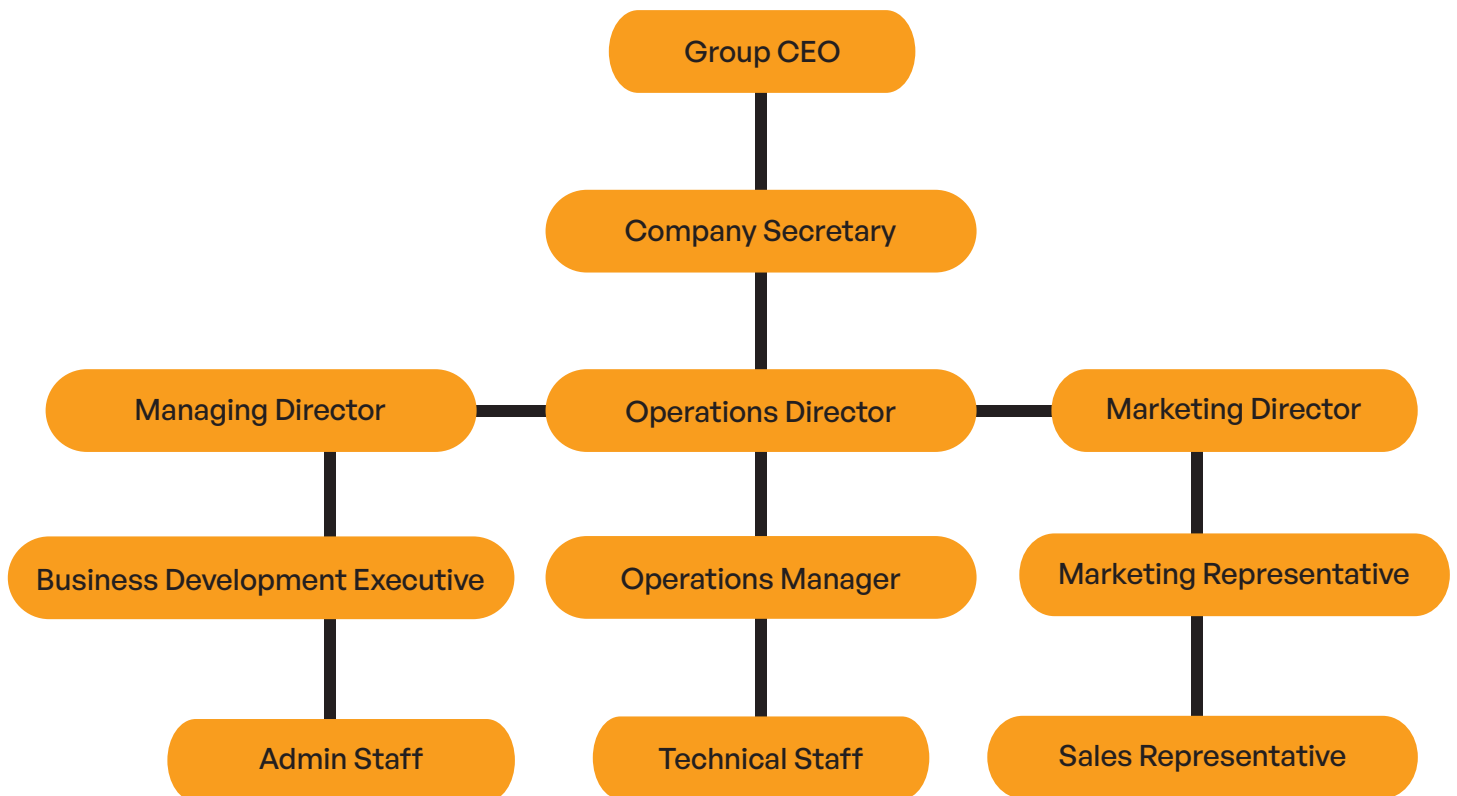

Mission

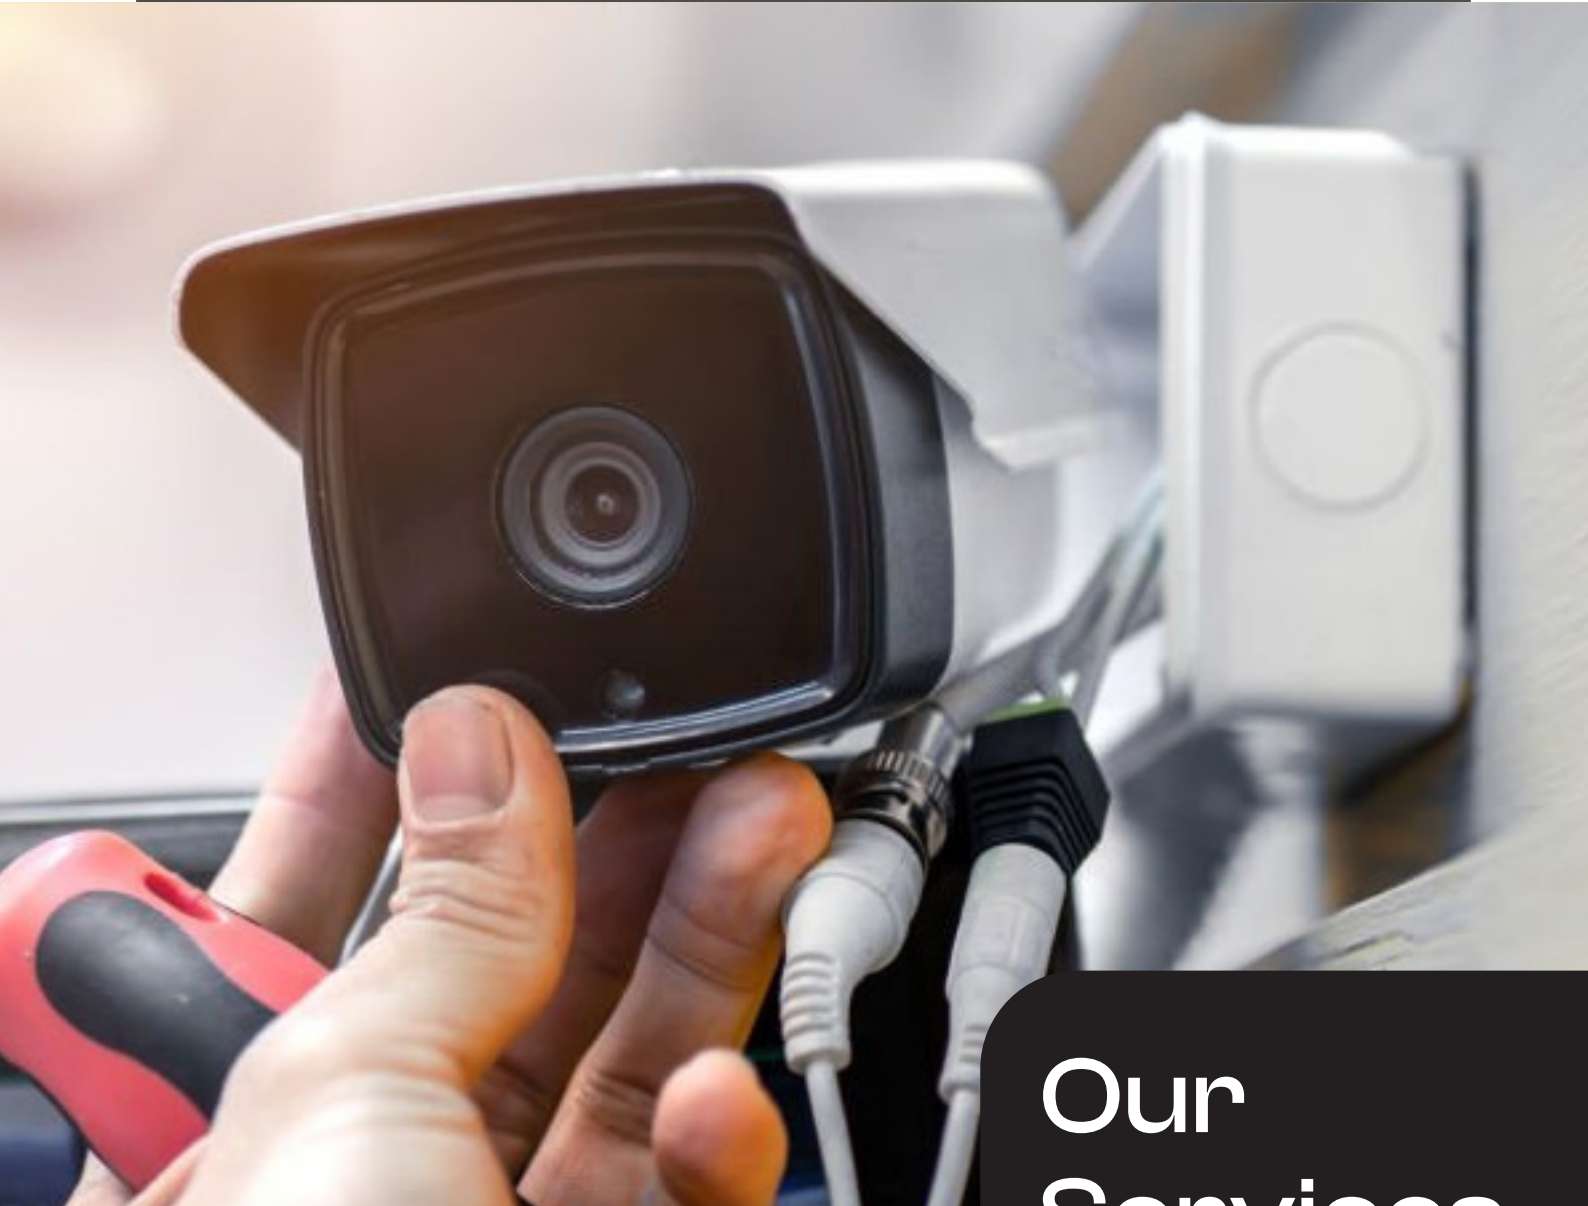

To do everything fully conscious of reassuring progress

Core Values

- Diligence
- Accuracy
- Excellence
- Professionalism
- Proficiency

Our Corporate Structure

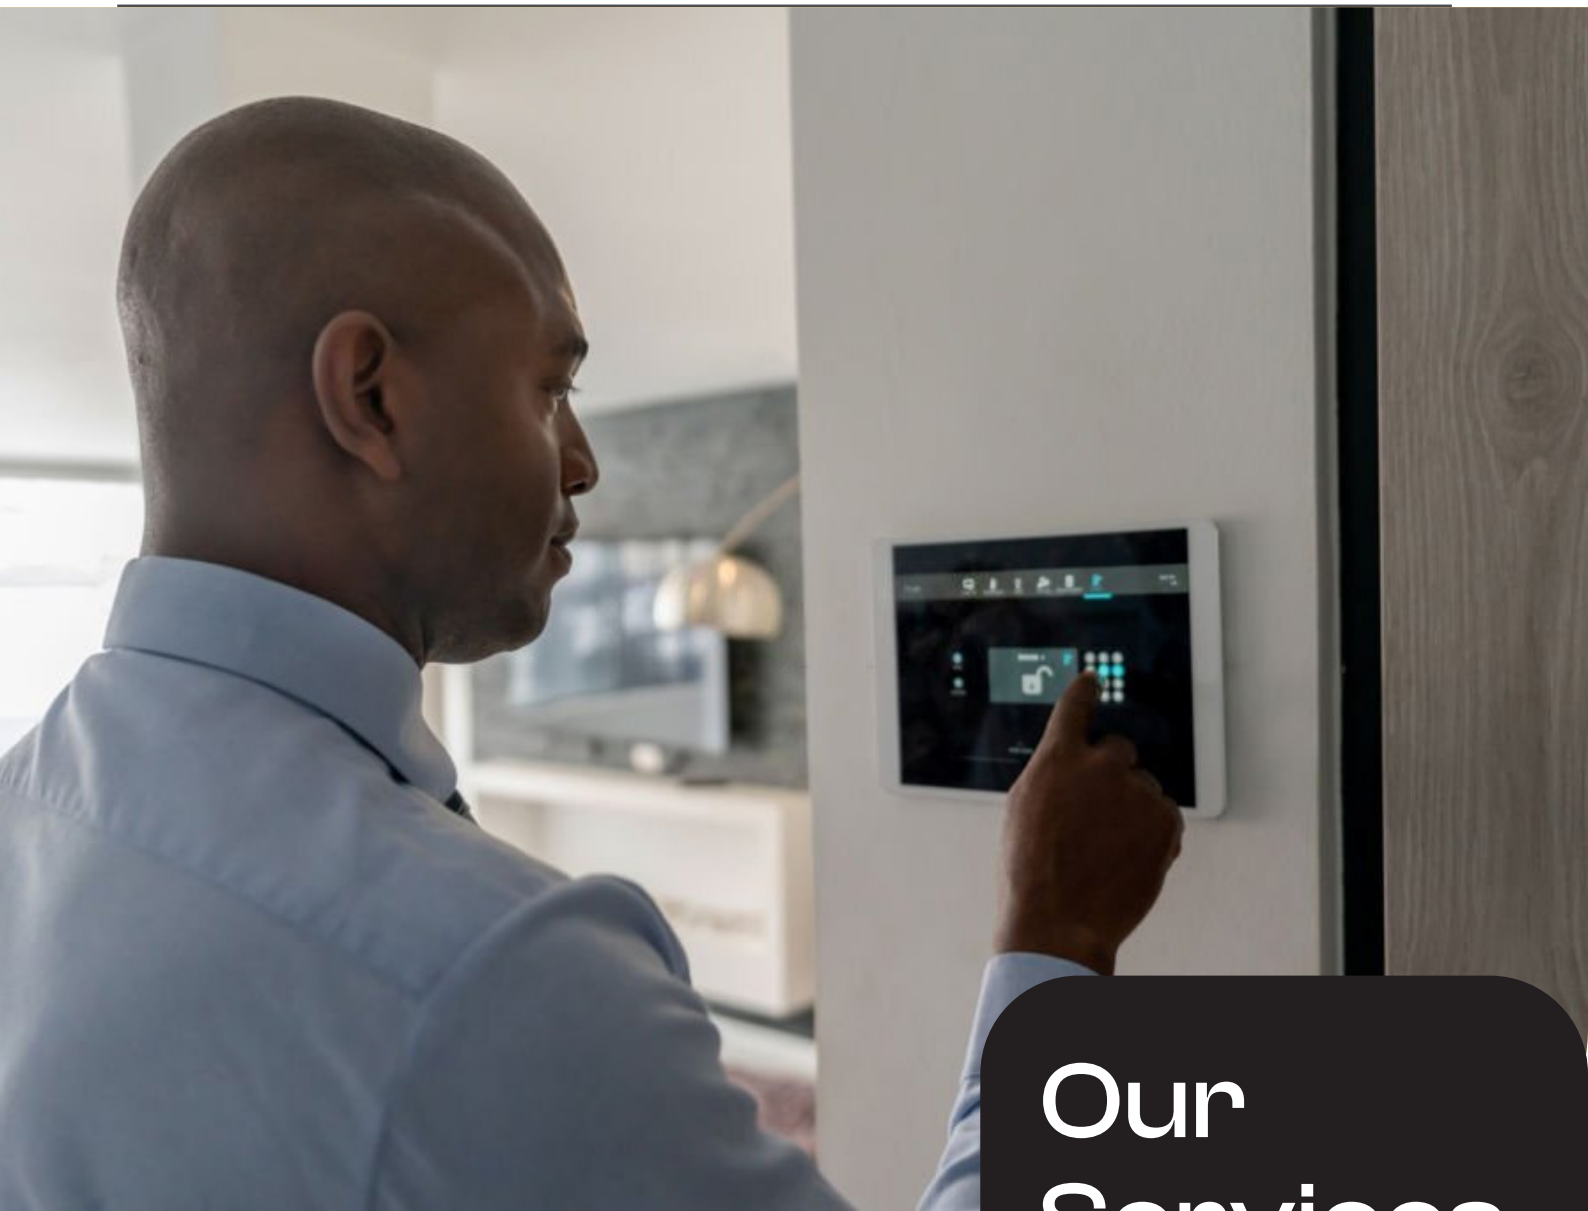

Our Services

CCTV Surveillance Systems

We have durable solar powered CCTV systems which have high quality video output and good storage. We have a myriad storage options available such as local storage, cloud storage, hard drive, SD cards and servers. We have HD cameras with high resolution and also hidden cameras. The CCTV footage allows remote viewing anywhere and anytime by the use of mobile applications

Our Services

Alarm System & Access Control

We supply a range of Access Control tech gadgets such as touchscreen operated, boom gates, biometric systems and face ID. These are high quality, durable and user friendly.

Our Services

Air Rifles, Blank & Pellet Guns

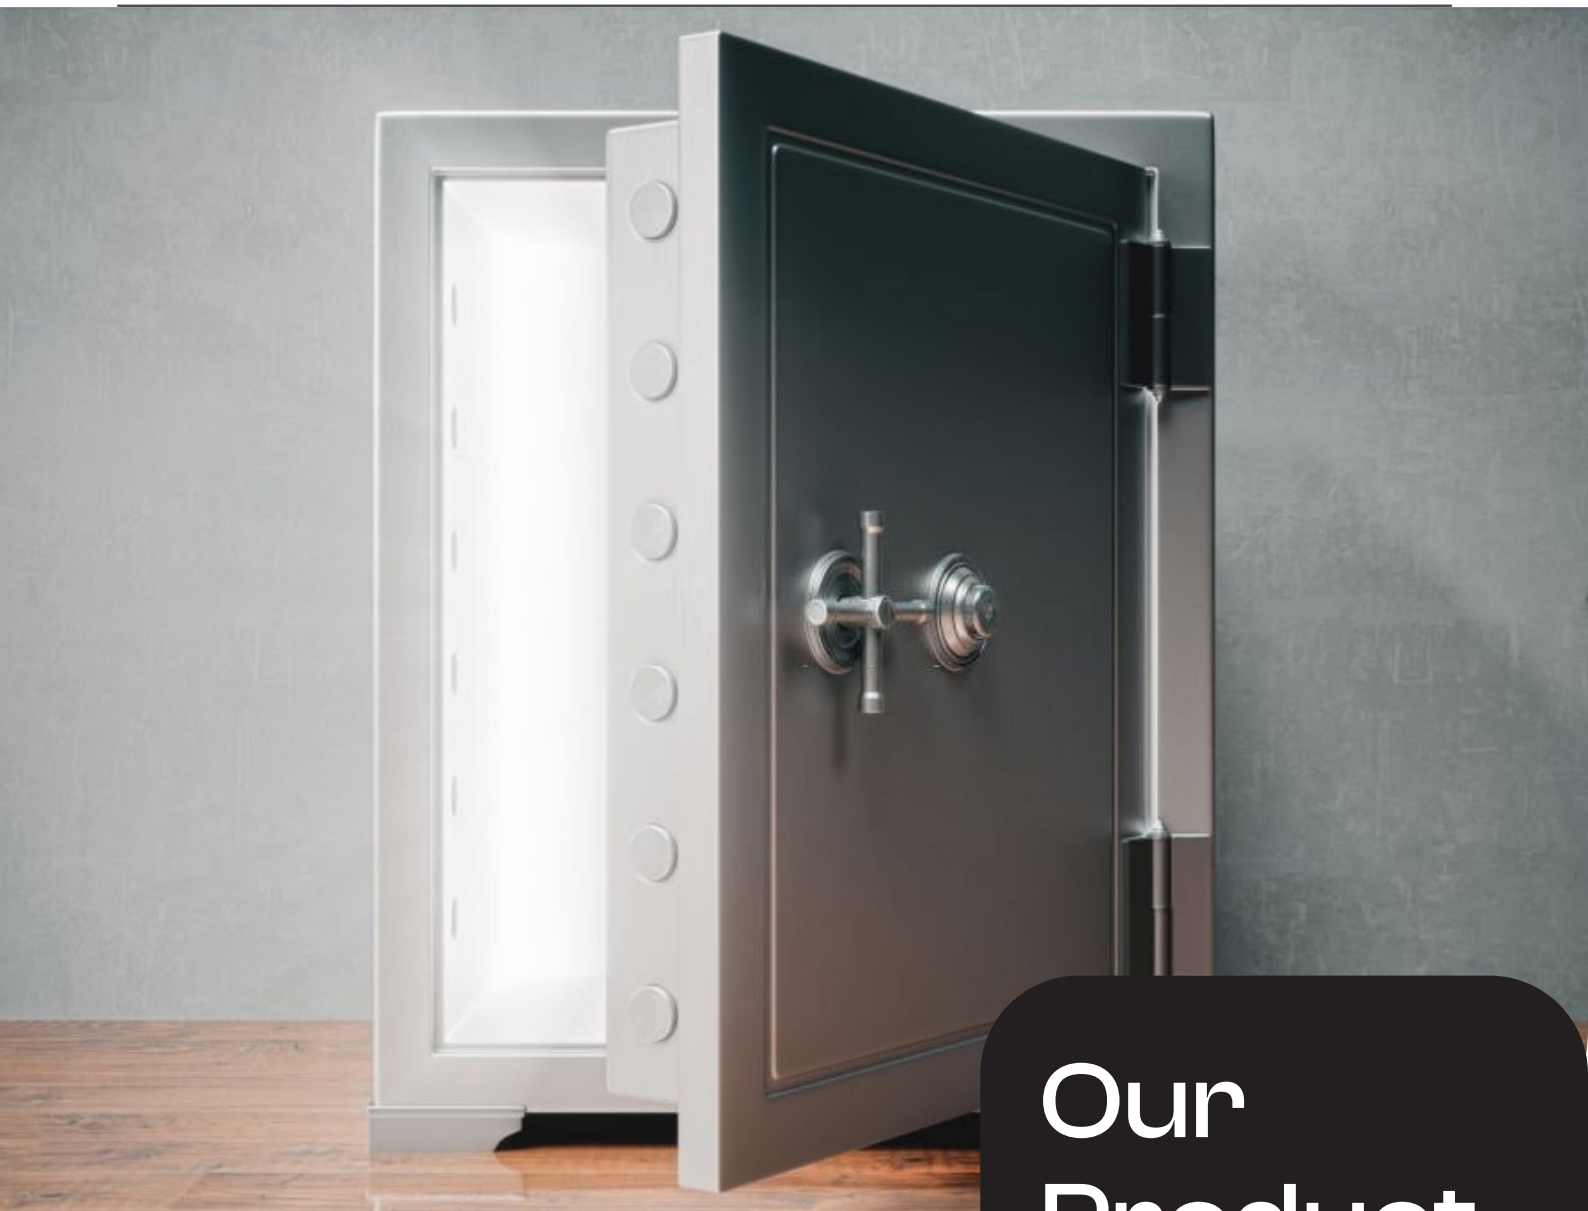

We have a wide range of guns that are licence exempt.

BLANK GUNS

Blank gun are shell casings loaded with gunpowder. They lack the deadly bullet point, which is usually replaced with cotton or paper wadding. When blanks are discharged, they create the sound of gunfire, and the gunpowder combusts, causing a muzzle flash.

PELLET GUNS

Pellet gun has air or gas which expands and the compression increases density, creating a greater pressure inside the barrel. When you press the trigger, this compressed gas is released, which hits a hammer inside the air gun. The hammer then hits the pellet with a great amount of force, sending it forwards with speed and power. The pellets can harm humans or animals and should be used for self-defence purposes

Our
Product

Safe /Vault

We have a wide range of safes and vaults which come in different sizes and shapes. We have different sizes for homes, businesses and banks and they are secured by a manual password, face ID, lock and key and fingerprint, depending on client's needs and preferences.

Our Services

Security Guards

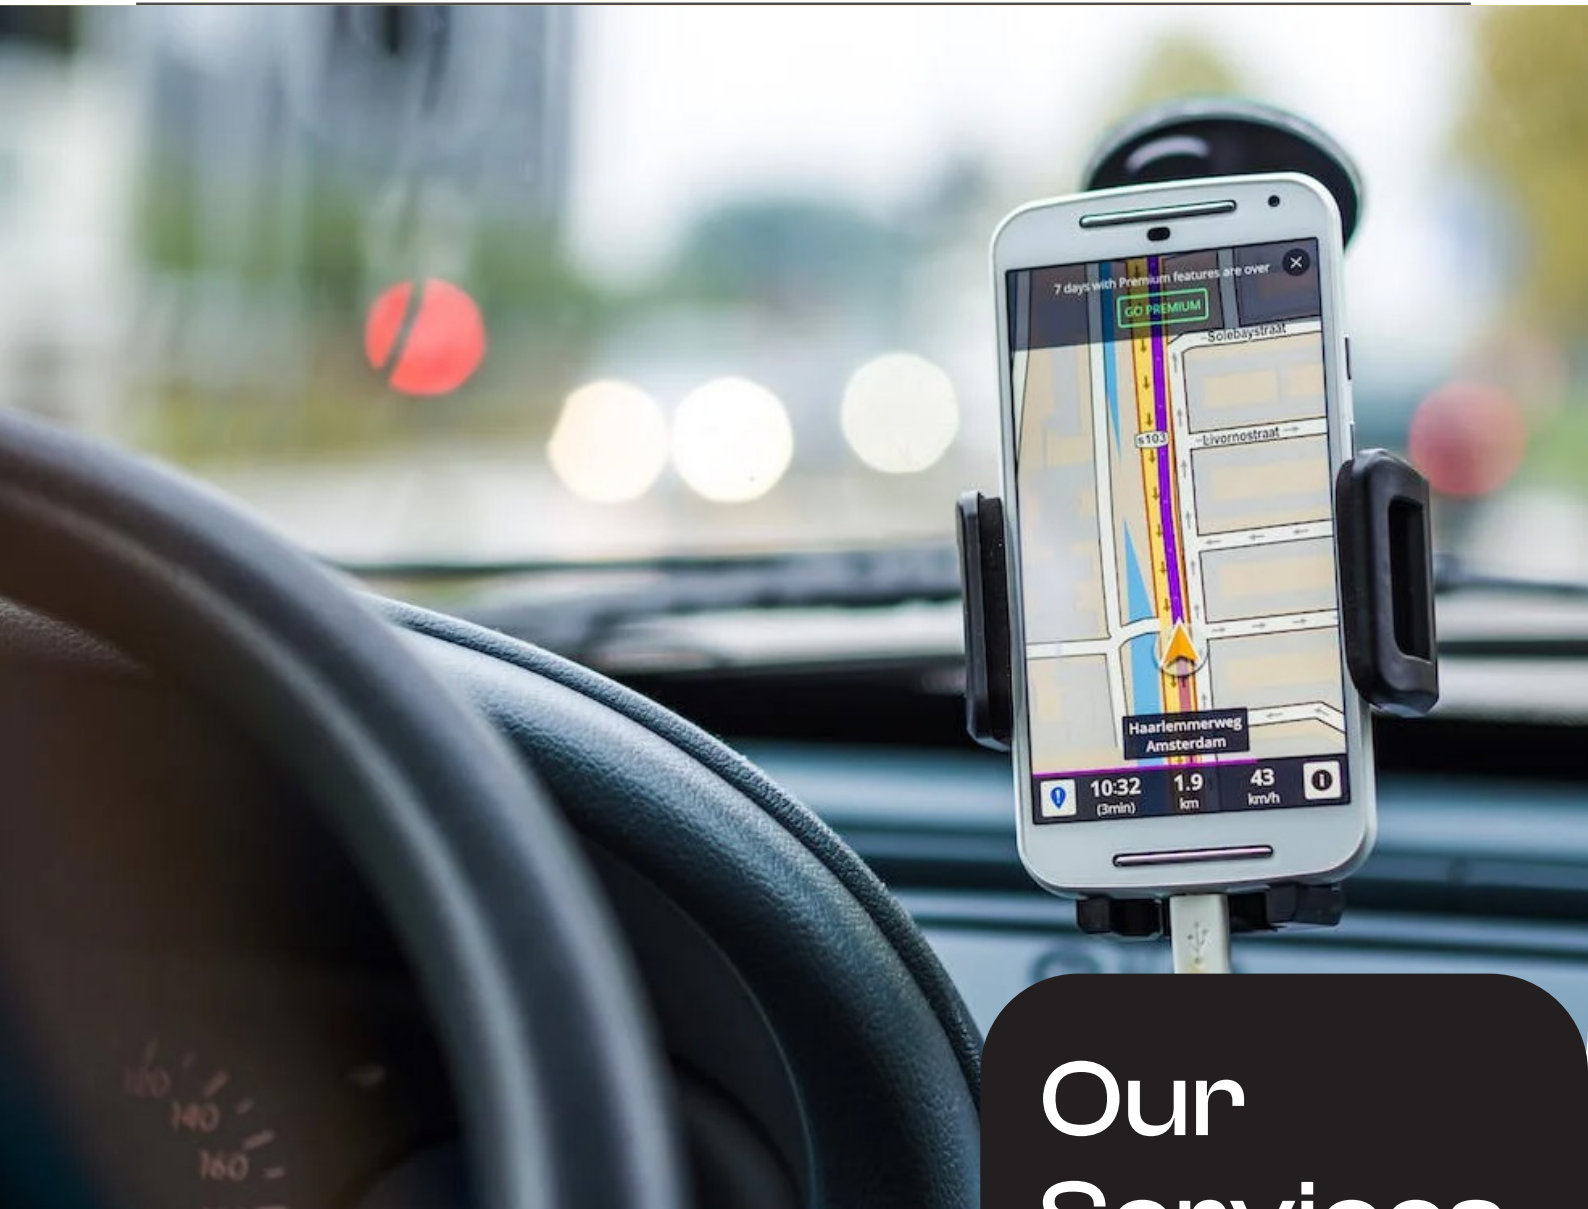

We offer highly trained security guards that go through various security screening procedures. Firstly, they go through the CID department to scan their fingerprints for any criminal record and police clearance. Also they go through a 2 weeks training session with our training sergeants. We select matured personnel who truly understand the value of our client's properties and assets

Our Services

Solar Systems

We supply PV systems for power generation for ON-and Off- grid applications. On-grid it works simultaneously with the state power authority like ZESA and it is tailored to client's needs. There is automation of power on and off which works hand in hand with ZESA. Off grid it is designed to run completely on solar without ZESA, it is mainly suitable for farms and mining where there are no easy forms to access electricity.

Our Services

GPS Tracking System

We offer GPS tracking systems that have versatile applications, they can be used in various industries such as transportation, fleet management and personal asset security. Also they have customizable solutions, they offer customized hardware and software options allowing tailored systems to specific needs. They have enhanced security, they allow quick vehicle
